DETAILED ACTION

Response to Amendment

1. The Examiner has carefully considered Applicant's amendments and accompanying remarks dated 05/17/06. Applicant's amendments to the claims have been entered, which better define the spatial arrangement of the layers. In Applicant's arguments, see response dated 05/17/06 have been fully considered and are persuasive. All previously made rejections have been withdrawn.

Specification

2. The ~~abstract of the~~ disclosure is objected to because on page 2 paragraph 0005 the reference number "100" is referenced for two different items.

3. Additionally, there is an extra period at page 1 line 11, after the word etc. Correction is required. See MPEP § 608.01(b).

Double Patenting

4. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA

Art Unit: 1771

1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

5. Claims 1-14 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-12 of copending Application No. 11/130749 (20060264142). Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims are both drawn to the same final structure, i.e., a nonwoven fabric having various regions defined by the concentration of the fibers within the regions, and an outer surface formed by melting the binder material at the surface of the nonwoven fabric, and said fibers may be PAN fibers mixed with thermoplastic fibers, found within the same percentages.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
